

Pupil Premium Strategy

The Pupil Premium is additional funding which is allocated to support children who:

- ✚ qualify for free school meals
- ✚ are looked after by the Local Authority
- ✚ have parents employed by the armed forces

The information below gives details of our Pupil Premium funding and our strategy to close the gap in attainment between groups of pupils.

2015/2016 Academic Year

Pupil Premium Grant for Mugginton CofE Primary School in 2015/2016 was £0

Impact could not be measured because we had no pupils entitled to pupil premium funding.

2016/2017 Academic Year

Pupil Premium Grant for Mugginton CofE Primary School in 2016/2017 is in the region of £2,600.

Three areas of need have been identified:

- 1) Reading fluency and comprehension
- 2) Basic number facts and written methods for addition, subtraction, multiplication and division
- 3) Self-regulation of emotion and independence

To address these areas we will use our additional funding to:

- ✚ provide additional hours of teaching assistant and higher level teaching assistant support across the week and across both classes.
- ✚ increase reading fluency and comprehension by listening to the children read every day and provide new reading books to increase motivation.
- ✚ purchase a synthetic phonics intervention programme (Read, Write, Inc) and train two members of staff to deliver the programme.
- ✚ subsidise the cost of educational visits and residential throughout the year.
- ✚ buy in additional support from the educational psychology and SSEN service to optimise our nurture sessions.
- ✚ run intervention/additional support sessions in the afternoon.

Our pupil premium strategy is evaluated alongside our intervention planning at the end of each half-term. Impact is measured via workbook scrutiny, daily observation, test performance, in-house test performance (for example, the 100 high-frequency word list) and reading assessments such as the Holborn Reading Test and the York Assessment of Reading Comprehension (YARC).

Review

This strategy will be reviewed in the summer of 2018.
